## What is a "dallasmakerspace.org" account and when would I use it?

The "dallasmakerspace.org" account is your gateway to the paradise of electronic interaction with Dallas Makerspace and all the wonders thereof.

Check [this](#) page for information on the "dallasmakerspace.org" account, its creation, and troubleshooting.

The "dallasmakerspace.org" account may be used for any of the following (and more!):

- [Accessing Billing Accounts](#)
- [Online Classes](#)
- [Managing Member Profile](#)
- [Editing Dallas Makerspace Documentation](#)
- [Create Blog Articles](#)

## Dallas Makerspace Ethos

- **Do-ocracy**
  - Dallas Makerspace is an organizational structure in which individuals choose roles and tasks for themselves inside DMS and execute them. Responsibilities attach to people who **do** the work, rather than elected or selected officials.
- **Be excellent to one another**
  - Foster an environment that will help others grow and learn about the fantastic projects originating from the makerspace community in Dallas and beyond.
- **Safety**
  - Maintain a safe working environment for yourself and other members. If you are unsure of a particular tool, machine, or device contact a [Committee](#) or [Board](#) member.

## Learn

- **Classes - Taking, and Teaching**
  - Electronics, Woodwork, Metalwork, Blacksmith, Weaving, Painting, Sewing, Leatherworking, Gaming, Pottery, and Art Glass just to name a few. Dallas Makerspace has a wide array of DIY interests to explore. Be sure to check the [Events Calendar](#). **Some classes have nominal fees; these are identified on the calendar.**
  - Classes take at least 48 hours, and may take as long as 72 hours to POST to the calendar once they are submitted by the teacher. This should be taken into account when classes are mentioned on [Talk](#) as having been submitted: they will take **2-3 days** to appear on the calendar.
  - Some notes about registering:
    - If you register, please attend.
    - If you cannot attend, please cancel your registration with some advance notice. Cancellation will open your space for someone else to attend. No-Shows are disrespectful to the instructor. This is important even if the class did not have restricted attendance.
    - When you press ENTER to register, the Calendar returns with a **big red button** that says "CANCEL". **DO NOT** press this button unless you really want to cancel. **Once you cancel, you cannot re-register.** There is no way around this.
    - The calendar system does not support a waiting list.
  - To review previous months' class offerings, time requirements, and (previous) class costs, choose "Calendar View" at the top of the [Event Calendar](#)

- Some classes are available online. Check out our online learning system at [learn.dallasmakerspace.org](http://learn.dallasmakerspace.org)
- Who can teach classes? Anyone! Check out the [Teach](#) page on our main website. See the wiki for more on the process: [Class Making Process](#)
- Frequently Asked Questions (FAQs) for Classes, including how to look up your Active Directory (AD) Group membership, are available at [this link](#).
- **Member Projects**
  - Members are constantly working on new ideas and may need your help.
- **Tool Certifications**
  - Tools which require training will have a sign with them. The laser cutters, table saws, auto lift, HAAS CNC mill, and MultiCam\_CNC\_router are examples of tools requiring "certification". **Some of the certification classes may have nominal fees; these will be shown in the class listing.**
  - Keep in mind, the tool certification classes are taught by volunteers. If one is not already on the [Events Calendar](#) check the committee's activity on the [Talk page](#). If there is no indication of an upcoming course, create a new thread requesting one on the Committee's Talk page or in the Interest Check Category on Talk. This helps to promote the class and is an effective way to call the attention of the people qualified to teach.
  - If you do not know how to use a tool or machine, contact a member of the specific [committee](#).
  - Becoming an expert on a tool and teaching other members is one of the best ways you can help the Makerspace.
  - We record tool certifications through the Active Directory (AD) system. Access to some tools require membership in the relevant AD group, which is recorded upon successful completion of the requisite training.
  - See which tool certifications are recorded for you using one of badge scanners in the Common Room, or by logging into the [DMS Member Portal](#).
- **Remote Access**
  - Some of our software and files are available remotely (with member log-in) on the "Jump Server". More information about the Jump Server is available on the [JumpServer FAQ page](#).

## Share

- **Saturday morning weekly public tour**
  - Learn and share your projects with Dallas Makerspace. The weekly public tours offered on Saturday morning is a great time to meet other Makers!
- **Cameras page**
  - See what's happening right now in selected workshops on our [Cameras page](#).
- **Forums (AKA "Talk")**
  - [Talk](#) is a great resource for project ideas, notes, and discussion.
  - Specific areas of interest (committees, SIGs, etc.) have their own category.
  - Community guidelines can be found in Talk by pulling down the menu next to your avatar (upper right hand corner), scroll down to ABOUT at the bottom, and select GUIDELINES.
  - Trust Levels are earned by participating in the forum. Learn more, and link to Discobot for interactive tutorial which climbs the ladder, [at this link](#).
  - Members-only sections can be accessed once Talk is linked to DallasMakerspace.org accounts using the [DMS Member Portal](#) (fka "green dot" process).

## TALK How-To and Guidelines

- **Text and Voice Chat**
  - Get in touch with other makers in real-time via Discord [DMS Discord](#)

## Contribute

- **Volunteer**
  - Help to make the Dallas Makerspace a better environment for its members. Organization, cleaning, installing, repairing are needed from time to time. Committees will frequently need assistance on their projects.
  - Become an Instructor. Pass your skills onto others. We are a 501c3 educational non-profit. Be part of the mission.
- **Committees**
  - Join a [Committee](#) of interest or need. Be part of the decision making process to improve a specific area within the Dallas Makerspace.
  - An historical explanation of committees can be found at the top of this page: <https://dallasmakerspace.org/wiki/Category:Committees>
- **Board**
  - Be part of the [Board of Directors](#) to contribute to the decision making process as a whole and help lead the Dallas Makerspace community.

## Voting

Voting is used for annual election of Board of Directors.

Brief Explanation of voting rights:

- DMS has two types of memberships, "Supporting Members" and "Regular Members"
- You become a "Supporting Member" when you first join DMS
- After 90 contiguous days of membership you are eligible to become a "Regular Member"
- Request changes to voting rights by logging into [DMS Member Portal](#)
- Only a "Regular Member" may vote
- By becoming a "Regular Member", we add to the number of voting members required to reach quorum (1/3 of voting members). This means it is especially important for regular members to participate. **If you find yourself unable to participate and vote, please switch back to being a "Supporting Member" (even if only temporarily) or assign your vote by proxy to a member you know will be participating.**
- [Official policies regarding Voting Rights](#) are described in the Rules & Policies page which is the controlling document.

An overview of Board of Directors elections, processes, and links to candidates is provided on the [Elections page](#).

## Safety

Safety equipment locations (historical)

Safety is of paramount importance. You are responsible for your own safety. Wearing proper protective gear is the first step and safety eyewear is available for temporary use throughout the space. Appropriate fire extinguishers and other safety equipment are situated throughout the space (click on the map).

- If you aren't certain how to do something safely - stop and ask for help.
- If you see someone doing something unsafe - please help them to do it safely.
- If it jeopardizes other people - please stop them from doing it.

## Storage

1. The Dallas Makerspace is not a storage facility, projects and materials that do not follow these rules, will be considered donations.
2. Projects (and materials for them) can only be stored in designated Project Storage Areas.
3. Projects (and materials for them) stored in the Project Storage Areas, must follow the rules and policies created by the [Logistics Officer](#). Details are in the [Project Storage](#) section of the Source.
4. Projects can be stored in committee controlled rooms, as long as they follow the committee's guidelines.
5. A project may be stored elsewhere with the approval of a member of the Board.
6. Projects stored in committee rooms or other places outside of the designated Project Storage Areas must follow these additional rules:
  - a. Projects must be labeled, and include the names of the members working on the project.
  - b. Projects should be presented as active at the Weekly Meetings.
  - c. Projects are urged to create a page on the wiki and place it in the Projects category.
7. Individual storage areas will be available for members:
  - Each storage area is approximately 16"L x 12"W x 9"H.
  - The appropriate storage box is supplied as part of the one-time fee paid for use of this storage. If you wish to purchase a different color box, we recommend using this [IKEA Trofast Box](#), Article Number: 102.525.73
  - The individual storage area is located in the northwest corner of the space, next to Electronics.
  - Details are in the [Personal Storage](#) section of the wiki.
8. Firearms, gunpowder, primers, and assembled ammunition can not be stored at the Makerspace.
9. Storage is not allowed in the parking lot(s).

## Parking

**NON-BUSINESS HOURS ONLY**  
**NEVER** block a  
dumpster, dock or ramp -  
ours or neighbors

1. There is no storage allowed in the parking lot.
2. Our lease prohibits overnight parking.
  - a. If your vehicle is here, you should be here.
  - b. All vehicles left for two consecutive overnights will be subject to towing by the landlord.
  - c. This towing will occur without further notice and at vehicle owner's expense.
3. Be considerate of our neighbors.
  - a. Please do not park near other tenants' front doors, back doors, dumpster, or loading docks/ramps during "business hours". Don't make it hard for their customers, suppliers or employees to access their buildings.
  - b. Remember that the front doors (and windows) of our eastern neighbors enjoy the view of our rear lot and dumpster.
  - c. Ensure your vehicle and/or trailer are completely within marked spaces.
  - d. Be especially conscious to avoid blocking access to loading docks/ramps.

## Donations

We only have so much usable space, so please don't just bring stuff up and leave it sitting on a table/the floor. Please contact the committee you think could use your item BEFORE bringing it to the space.

We also have a "Member Exchange shelf", where you can drop off things that other people might be able to use. If the shelf is full, please don't pile things in front of it or leave them elsewhere in the space. Do NOT leave CRT monitors, paint, or anything that can't be thrown away legally on the free shelf. A full list of unacceptable items is on the [Member Exchange Shelf](#) section of the Logistics committee page. The dumpster is not far away; please place items accordingly.

For more information, please see the [Donation Section of our Rules](#).

## New Member Signup

- Any guest can register to become a member of Dallas Makerspace by going to <https://dallasmakerspace.org/join/>
- Any new member needing badge activation can sign a liability waiver (must be done in person on a lobby kiosk) and following [this activation procedure](#)

MM3signup\_edited\_01.pdf
