

Ceramics

Welcome to the DMS Ceramics Source Page!

Our purpose as the Ceramics Committee is to provide an open learning environment where makers can choose between different ceramic techniques: hand building, wheel throwing, or slip casting, not only to begin, but also to accomplish a ceramics project. As a Committee, we offer beginner classes in all the above mentioned techniques to ease new makers into the ceramics process and teach all the necessary information to achieve a finished product. Our Committee members also enjoy teaching intermediate and advanced classes that highlight their skill sets. As a Committee, we aim to create a community where we can share ideas, collaborate, and push each other to become better potters.

Here you will find all the rules and important information related to DMS Ceramics.
